### **Hints:**

- ? Look for sites that have larger print and graphics since they are meant for younger students.
- ? Use quotation marks in the Search Engine to help define the topic (eg: "Vampire Bats")
- ? Before you use the Internet, have a list of questions ready so you know exactly what information you need to research (why search for information you already know?).
- ? Remember to keep an on-going list of sites you visited (use MS Word to keep this list and copy/paste the URL - Internet Address - into a document).
- ? You must use proper Net-citation if you use any information from Internet. Copying is not allowed; you must respect copyright laws.
